Is a list? No Yes

Hidden No Yes

Select a plug-in

Then go to the product you want and add the custom field

Title	Value	Price	Type	Delete/Move
External Link link Title <input type="text" value="size chart"/> Url <input type="text" value="p://toastedweb.net/images/delivery.png"/> Open in <input type="text" value="popup"/>			Plug-ins ☆	 

By default virtuemart has the ontop Layout position . You can create your own position and assign the custom field there by altering the default.php file in virtuemart product details

components\com_virtuemart\views\productdetails\tmpl\default.php

For example if you want to add a new layout you put this code in the default.php file

```
<?php if (!empty($this->product->customfieldsSorted['new-position'])) {  
    $this->position='my-position';  
    echo $this->loadTemplate('customfields');  
}  
?>
```

and add my-position as layout position in custom field
